

# In three simple steps you reconfigure the EnergyManager after replacing a MyReserve device:

## \land IMPORTANT

Before changing device settings in the EnergyManager SmartSetup, the previous MyReserve device must be uninstalled and the installation of the replacement device must be completely finished.

#### 1. Search and Install MyReserve

#### SmartSetup > Search for devices

- Select the entry **MyReserve** in the Search drop-down list and add the device to the search
- Start the search by clicking on **Search and Install devices** and find all MyReserve devices again.

The System searches for devices that ar	e selected in the search configuration and installs them.
Add devices to search	
Storage	
MyReserve / AC Sensor	
Sensor	

## 2. Perform device exchange in SmartSetup

- SmartSetup >Search devices > Device list
- Click on the gear icon next to the device to be replaced
- Select **Replacing a device**

Storages

	Cancel Cancel			

#### 3. Check MyReserve Allocation

#### • SmartSetup > PV plants

- Check that the new MyReserve is assigned to the correct PV plant
- Confirm assignment with Save and continue

PV plant 2 🖋	< 2 of 2 >
MyReserve and inverter	Only inverters
O No MyReserve	Please choose the inverter(s) for this PV plant:
PV plant with MyReserve	SMA Nr. 1930035420 (xx.17.89)

- SmartSetup > Household consumption
- Check whether the new MyReserve is allocated to the category Devices measured by the primary meter ("on the house-side"). Otherwise, select Change device assignment and classify MyReserve as a device measured by the primary meter.
